Fee	£ 3384.00 You may be eligible for support with your tuition fees - please visit the college website - funding and finance page for further information
Course Code	AFP-AH3D-1100

## Course Overview

---

This course is designed to prepare mature students for university level study. If you want to work in nursing, as a midwife or in related health professions such as Physiotherapy or Paramedic Practice, this is the course for you.

In 2022-23, 94.4% of students on our Access Nursing & Midwifery diplomas secured offers of university places. This compares with a progression rate of just 55.4% across all Access diploma courses in England and Wales.

The course runs for an academic year and you will be in college three days per week for 32 weeks. You will be attending for 13 hours per week (12 hours of lessons and 1 hour of tutorial). You will also need to allow at least 12 hours per week for private study and assignment completion.

Approximate times: 9.20am - 3pm (exact times to be confirmed)

## Course Requirements

---

This course requires you to have achieved GCSE English Language and Maths at grade C/4 or better before enrolling on the Access Diploma.

In some circumstances, we can accept Functional Skills Numeracy level 2 instead of GCSE Maths.

Please note that for some degree courses (e.g. Midwifery), you will also need GCSE Science at grade C/4 or better.

If you don't meet the entry requirements, don't worry. You can apply for our level 2 pre-Access course which will prepare you for the Access to Higher Education Course. You can also work towards achieving your GCSE Maths and/or English at the same time.

The pathway will run subject to minimum numbers being reached.

## What You Will Learn

---

On this Access Diploma, you will study a double module of Human Biology, plus a module of Health Studies. In addition, you will complete a module of ungraded Developmental units, which are designed to develop the academic and study skills you need to be a success, not only on the Access Diploma, but also in your future university-level studies.

## Assessment

---

Assessments include essays, practical reports, case studies, open or closed-book examinations and verbal, visual or IT-based presentations. All modules will include an element of time-constrained assessment which will contribute towards the final module grade.

Upon successful completion of this course you will be awarded an Access to Higher Education Diploma from Open Awards.

## Progression

---

Most university admissions tutors will accept the Access to HE Diploma as an entry qualification for Higher Education, but there may be some degrees for which this certificate alone may not be acceptable. The suitability of the course for your ultimate career aim will be discussed at interview.

Progression from this pathway can be on to degree programmes such as Midwifery, Adult Nursing, Children's Nursing, Physiotherapy, Paramedic Science, Integrated Practice in Learning Disabilities Nursing and Social Work, Operating Department Practice, Mental Health Nursing and many more.

Please note that whilst your subject tutors and Personal Tutor will make every effort to support your application for a university place, progression onto a specific higher education course cannot be guaranteed. It can be a highly competitive process, and your tutors, together with the college Careers Advisers, will try to give you realistic advice as to your chances of progression. Alternative routes into the career of your choice can be discussed.

One of our past students, Jonathan Peers provided the following case study:

I'm currently in my final year of my Paramedic Practice degree. The Access course allowed me to get a good base of knowledge for starting my degree especially when it came to bioscience and biology as well as essay writing.

I'm currently studying at Edge Hill University. I felt a lot more prepared for starting my degree through doing the Access course. It was tough and it required a lot of hard graft to get me here, but I was really pleased with my time at the college.

Over the past 3 years I've been involved in major incident training with North West Ambulance Service, as well as facilitating practice with newer students on the course. Next month I'm assisting the university with liaising with paramedic students from Czech Republic, Germany and Finland as part of an exchange program.

Without Access I'd never have got to the point where I am today. I really wasn't very academic when I first started college. I'm expected to come out with a 2:1 at university and I've just had confirmation of my job with North West Ambulance Service

## Career Options

---

midwifery, nurse, social worker, physiotherapist, paramedic

## Mandatory Units

---

On this pathway you will study the following units:

- Human Biology (mandatory)
- Health Sciences (mandatory)
- Either Health Studies or Psychology
