

## Level 2 Diploma in Performing Engineering Operations

Location	Stretford Campus
Course Type	College 16-18
Department	Engineering
Start Date	Monday 2nd September 2024
Course Code	TFP-EG2D-1100

### Course Overview

---

This course is intended for learners 16-19-year-old and is delivered over one year it is designed to give you an understanding of a wide range of engineering practices allowing you to develop a range of practical engineering skills. The practical work aims to cover a range of engineering disciplines including hand fitting, Fabrication Engineering and computer aided design. Alongside the practical lessons you will also study some underpinning theory to further develop your understanding of engineering processes, you will cover topics such as, working safely in engineering, using and communicating technical information and carrying out engineering activities efficiently. This programme will allow you to develop work related skills in preparation for further training or employment.

If you are a person who enjoys learning by 'doing' and is more 'hands on' then this course is for you.

### Course Requirements

---

You will need 4 GCSEs at Grade 3 or above (including English Language and/or maths).

### What You Will Learn

---

You will learn the fundamental skills and knowledge common to all engineering practices, including health and safety requirements, communicating engineering information and working efficiently and effectively in engineering as well as developing core engineering skills.

### Assessment

---

You will be continually assessed through observation, practical and written assessment techniques.

## Progression

---

BTEC Level 3

L3 City and Guilds

Core Qualification for an apprenticeship

## Career Options

---

Achieving this qualification could help you progress in a variety of engineering roles, such as:

Electrical engineer

Engineering technician

Electronics assembler

Engineering maintenance fitter

## Mandatory Units

---

Working safely in an engineering environment, carrying out engineering activities efficiently and effectively, Using and communicating technical information, Producing Components Using Hand Fitting Techniques, producing sheet metal components and assemblies and CAD.

## Contact Details

---
